NewPro Long-Term Protective Coating RK CCS

On Car Paint

Vehicle: OPEL Omega age ca. 12 years

Application: Spray process

Preparatory work: Only basic cleaning

Uncoated

Long-term coating RK CCS

Uncoated

Long-term coating RK CCS

Bottom line:

Small to medium scratches are no longer visible after a spray coating with **long-term RK CCS** paint. This type of coating behaves similar to clear lacquers. Time-consuming preparatory work due to laborious polishing of the paint, as with competitor products, is no longer necessary.
